LIQUID TOUCHLESS CAR WASH

This product is a super concentrated liquid detergent designed to perform in touchless car wash systems. It will remove soil and road film in applications where only the best powdered products have been effective.

This product has medium alkalinity and contains no solvents. It is safe to use on all painted surfaces, metal parts, plastic and concrete. It is also ideally suited for use in pressure wash applications and may be used as an automotive presoak.

DIRECTIONS: For cleaning of most surfaces with touchless car wash or pressure wash equipment, dilute 1:100 to 1:250 with hot water for best results. Wet the entire surface to be cleaned with wash solution. Clean each section thoroughly. Rinse with cold water and allow to drain. The product can be readily dispensed with a hydrominder or concentration controller.
