

A270

## RUST INHIBITOR

This product is a clear, light yellow solution formulated with a blend of specific corrosion inhibitors designed to protect against rust, pitting and corrosion of steel and soft metals.

This product is well suited for use on undercarriages of vehicles after car wash application and may be used in a number of other corrosion prevention areas.

**DIRECTIONS:**

Dilute product 1:100 with water and spray on clean surfaces requiring protection. Do not rinse. Allow to drain dry so a firm protective film can form on the metal surfaces.
