ALKALINE BUG REMOVER

This product is a high pH detergent with excellent solvency, formulated to quickly soften bugs from automotive windshields and grills.

DIRECTIONS:

READY TO USE BUG REMOVER

Apply product directly to bug splattered regions using a sprayer. Allow to soak for 30 – 60 seconds. Scrub surface with a brush and blast bugs away with a pressure washer. Rinse thoroughly.

SERVICE STATION WASH TANKS

Add 25 mL per Liter of water. Scrub windshield with sponge side of squeegee. Remove excess liquid with squeegee.

WINDSHIELD WASHER ADDITIVE

Add 100 mL to a full reservoir of water. Product will mix in while driving. Bugs will soften up and be removed after a few wash cycles.

CAUTION: Do not apply to hot surfaces. Do not allow concentrated product to dwell for too long on surfaces. Do not allow product to dry on vehicle.
