INDUSTRIAL RED

This product is a concentrated caustic cleaner and degreaser formulated for washing industrial trucks, trailers, tractors, heavy duty equipment and buildings. It is built with a very high foaming surfactant package that produces rich dense foam, especially when used with a foamer.

It is fortified with citrus terpenes and water soluble solvents for exceptional degreasing. The chelating ingredients make it effective for use in all water conditions. This biodegradable detergent effortlessly removes the toughest greasy soils and is free rinsing.

DIRECTIONS: This product is ideally applied with a foamer using hot water. It may also be used as a pressure wash detergent. Allow the product to soak on the surface being cleaned for as long as possible without drying. Rinse off completely.

For heavy duty degreasing of trucks, equipment, engines and tires, dilute product 1:5.

For light duty degreasing and general cleaning, dilute product up to 1:100.
