J.C. 100 LIQUID PRESSURE WASH

This is a very concentrated liquid pressure wash detergent designed to be used in power washers with hot or cold water. It combines the cleaning properties of powders with the convenience of a liquid cleaner. It contains solvents and emulsifiers for degreasing and loosening of heavy soil deposits and detergents to remove all dirt and road film leaving a clean surface. This product is safe to use on all painted surfaces, metal parts, plastic, concrete and wood.

DIRECTIONS: For cleaning most surfaces with pressure wash equipment, dilute 1:40 to 1:100 with water. Best results are obtained by using hot water. Wet the entire surface to be cleaned with wash solution. Clean each section thoroughly. Rinse with cold water and allow to drain.

For heavy cleaning of equipment, engines, etc., dilute 1:10 with hot water. Leave on surface for approximately 5 minutes. Rinse with warm water and allow to drain dry.
