POWERFOAM EXTRA

This is an all-purpose cleaner-degreaser for use in industrial and institutional applications. It contains alkaline builders, water soluble solvents, emulsifiers, water softeners and highly active synthetic detergents. It has a pleasant fragrance, is biodegradable and non-flammable.

This product is also very effective for cleaning fin fan aerial coolers. When applied with foaming equipment, the solution will form a thick stable foam which will adhere to vertical surfaces and provide contact time.

DIRECTIONS: For effective cleaning and degreasing, dilute with up to 80 parts of hot water. Apply with a foam generator or pressure washer.
