PITCH-OFF (SAW CLEANER CONCENTRATE)

This is a heavy duty alkaline cleaner. It is ideally suited for use in soak tanks for cleaning saws. The product is very effective in many mill applications. It can be used to remove pitch or grease from steel, glass or plastic in the plant or in the shop.

DIRECTIONS: Use Pitch-Off at a concentration of 40 ml per litre (6 oz/gal) in the soak tank. Soak saws until soil is soft, best results are obtained with a hot solution. Remove saws and allow to dry. Heavy soil may have to be removed with mechanical brushes. For concrete floors, automotive and industrial cleaning, use product at a dilution of 1:40 in hot water.

ATTENTION: Do not use on aluminum, soft metals or painted surfaces.
