## PITCH OFF II

PITCH-OFF II is an emulsified solvent cleaner designed for the safe removal of pitch from saw blades and equipment. Naturally-derived citrus and pine terpenes readily dissolve tacky pitch encountered in the forestry industry. The emulsifier package solubilizes the dissolved pitch for easy removal.

PITCH-OFF II is non-flammable, non-corrosive and readily biodegradable. It does not contain any added dyes or fragrances, yet has a mild pine-citrus scent from natural terpenes. It is formulated for effective removal of pitch without compromising worker safety or environmental stewardship.

### DIRECTIONS:

For heavy duty cleaning of pitch, use PITCH-OFF II undiluted. Best results are obtained by maximizing contact time without drying. It may be used as a soaking solution, wiped directly onto equipment or sprayed on to maximize surface area contact. For light-duty and routine cleaning of tools and equipment, PITCH-OFF II may be diluted with water. Removal of stubborn pitch may require mechanical scrubbing with a nylon brush. Rinse with hot water for best results.
