H-4555 GLYCOL SOLUTION -30°C

This product is an inhibited ethylene glycol antifreeze solution and heat transfer fluid of medium toxicity.

It is a clear, colourless liquid with practically no odour. This product has been premixed with water to provide freezing protection down to -30°C.

This glycol solution was designed for use as a non-freezing heat transfer medium for use in heating systems.

It can be diluted with water if freezing protection to -30°C is not required and is compatible with our boiler water treatment compounds.
