PRESOAK SUPER CONCENTRATE

This product is a high alkaline solvent-based detergent concentrate automotive prespray. It may be used with wand wash or automatic touchless equipment. It is formulated with a blend of biodegradable surfactants, solvents and chelating agents for effective removal of dirt and road film.

DIRECTIONS: For use with automatic touchless equipment or wand wash as a prespray, dilute product 1:100 to 1:200.

For use as an engine and tire cleaner, dilute product 1:50 to 1:80.

CAUTION: Contains caustic soda. Avoid prolonged contact with chrome and aluminium, especially when running at a high pH (>12).
