POWDERED CARWASH SUPER CONCENTRATE

This product is a moderately alkaline highly active powdered car wash that is safe for use on all surfaces. It may be used with pressure wash equipment or for manual cleaning. This detergent can be used in hard or soft water conditions and produces copious foam. The combination of degreasing surfactants, active alkalinity and water conditioners all contribute to the effective removal of dirt, road film, and road salts.

DIRECTIONS: For use with pressure wash equipment, use 2-3 g/L (1/3 – 1/2 oz/gallon).

For manual cleaning, use 3-6 g/L (1/2 - 1 oz/gallon).

Dissolve powder in hot water. For best results, wash using hot water and rinse with cold water.
