## E-10 LIQUID CIP CLEANER

This product is an extra heavy duty liquid chlorinated circulation cleaner for "in place" cleaning of equipment in dairy and food plants. It is specially formulated for the effective removal of protein and butterfat in pipelines and bulk tanks.

**DIRECTIONS:** Pre-flush thoroughly with clean water. Dilute product using 2 ml/litre (1/3 oz/gallon) of water at 60°-70°C. A higher concentration is required for hard water areas. Circulate above solution in tank and through lines for 8-12 minutes, brush all parts that do not come in contact with detergent solution. Rinse thoroughly with potable water to remove all detergent solution. Just before processing, sanitize tank and pipelines by circulating 200 ppm chlorine solution. Drain completely.

**FOR COMMERCIAL USE**
