

E406

AGRICULTURAL FOAM PLUS

This product is a highly stable extra concentrated foaming agent ideally suited for use in the farming community as marker foam. This product has built-in water softening agents. No other additives are required to achieve satisfactory performance.

When used as recommended in foam generators it will produce a tight knit stable foam that is virtually unaffected by wind.

Agricultural Foam Plus solution is a safe product that will not harm vegetation, soil or equipment.

DIRECTIONS: Dilute product 1:150 parts of water and apply with automatic marker equipment as balls or blobs on the field.
