

E412

NO FOAM

This product is a concentrated defoamer useful for controlling both entrained air and surface foam in agricultural sprays.

It performs well with all agricultural chemicals and is especially effective with thickening agents used for agricultural sprays.

No Foam is especially effective in re-circulating sprayers or other high agitation equipment.

DIRECTIONS:

Use 16 to 30 ml per 100 litres in every 4th or 5th load. Defoaming capabilities are carried over from one batch to another. Rates of product may vary with tank size, type of agitation, chemical being used, and type of water being used.

Air Application: Add to pre-mix tank as soon as possible during filling.

Ground Application: Add to spray tank as soon as possible during filling.

Shake well before use.

Residue in bottom of container is normal.
