## AMMONIUM SULPHATE SOLUTION

This product is not just another fertilizer grade product. It is a unique true liquid sulphate for use with glyphosate (Roundup®) type products or other herbicides where ammonium sulphate is recommended.

It is easy to handle and easy to mix and is intended to replace other dry or liquid ammonium sulphates.

Dry ammonium sulphate is both abrasive and corrosive to spray application equipment along with being difficult to handle. This product has a corrosion inhibitor added and is non-abrasive. It also has a pleasant odour and distinctive green colour for easier visibility.

### TYPICAL PROPERTIES

Nitrogen (N)	8.0%
Sulphur (S)	9.0%
Specific Gravity	1.217
Freezing Temperature	-15°C
Appearance	Light Green
pH	6.0 - 7.0
Low Corrosion	

**General Use Rate:** 2.5 - 5 litres of Ammonium Sulphate Solution per 100 litres of spray solution.

**SHAKE WELL BEFORE USING.**

**COMMERCIAL USE ONLY**
