LIQUID SPRAY TANK CLEANER

This product is a specially formulated cleaner and neutralizer for spray tanks.

DIRECTIONS: Use 0.5 litres to 227 litres (50 gallons) of water. Allow spray tank to agitate and circulate cleaning solution for approximately 15 minutes. Exceptionally dirty or corroded tanks or tanks that have retained residue for an extended period may require additional cleaning time and a stronger cleaning solution. After draining cleaning solution, tank and equipment should be rinsed twice with water.

Note: Cleaning or rinse solutions containing residue of pesticides are subject to stringent disposal requirements. Follow local, provincial and federal regulations.

CAUTION: Contains caustic material. This product may damage aluminum and other soft metals on prolonged contact.
