ORGANIC SANITIZER

This product is a hydrogen peroxide based sanitizer ideally suited for use on dairy farms, including organic milk operations.

For sanitizing of milking equipment, dilute 1 3/4 liters in 20 liters of water (14 oz/gal). This will make a 3% hydrogen peroxide concentration.

When using this product for udder washing and pre-dipping, dilute 300 ml in 20 liters of water (2 1/4 oz/gal). This will make a 0.5% hydrogen peroxide concentration.
