

F380

AF-40 AGRICULTURAL FOAM

This product is a highly stable, super concentrated foaming agent ideally suited for use in the farming community as marker foam. This product has built-in water softening agents and no other additives are required to achieve satisfactory performance.

When used as recommended in foam generators, it will produce a tight-knit stable foam which is virtually unaffected by wind.

The diluted use solution is a safe product. It will not harm vegetation, soil or equipment.

DIRECTIONS: Dilute product 1:100 parts of water and apply with automatic marker equipment as balls or blobs on the field.

CAUTION: Avoid prolonged contact of concentrated product with skin. Keep out of reach of children.
