

G471

QUAT-SAN CONCENTRATE (128X)

ACTIVE INGREDIENT:

2.56% n-alkyl, (60% C₁₄ 30% C₁₆ 5% C₁₂ 5% C₁₈), dimethyl benzyl ammonium chloride

This product is designed for easy dilution with a hydrominder or other compatible dispenser. It is ideal for restaurants: use for sanitizing food processing equipment, dishes, glassware, cooking utensils, counters or any other hard surface.

This product is safe to use on all hard surfaces. It may also be used to sanitize floors, walls, sinks, garbage cans, telephones, bathrooms, door knobs, vending machines and other high traffic areas.

DIRECTIONS:

To produce a no-rinse sanitizer with 200ppm active quaternary ammonium compound, use a 1:128 tip or dilute 8 mL per L of water.

Ensure that all surfaces are thoroughly cleaned with a detergent and rinsed before using this sanitizer. Apply sanitizer liberally until surface is completely wet. Allow at least **one minute contact time** for effective sanitation before wiping dry with clean paper towel or allowing to air dry. No rinsing is required at 200 ppm.

Prepare fresh sanitizer in accordance with the Federal/Provincial/Territorial Food Safety Committee Food Retail & Food Services Code. Do not reuse sanitizer.
