## ANTI SLIP FLOOR TREATMENT

This product is used to make concrete and tile surfaces safer by enhancing traction. It is ideal for use in restaurants, malls, office buildings, shower rooms and processing plants.

**DIRECTIONS:** Pour product directly on surface to be treated. Spread with mop or brush. Let stand for 15 minutes for Quarry Tile or 30 minutes on porcelain tile. Squeegee excess down drain or pick up with mop and rinse well with water.

This is an acid product that needs to be rinsed completely after application. Test product on an inconspicuous area before use. Repeat monthly on slippery areas.

**Dilutions:**

Straight	Anti Slip Floor Treatment
1:4	Concrete Cleaner
1:128	Daily Floor Cleaning

**FOR COMMERCIAL USE**
