D-40 H D DEGREASER

This product is a unique degreaser that can be diluted with kerosene, diesel fuel or water. It has been proven effective in many oilfield and industrial applications. This product will soften and remove tar and heavy oil deposits from metal parts without harming paint. The biodegradable emulsifiers and surfactants ensure this degreaser rinses quickly and completely with hot water. It will not freeze and is safe to use on all metal surfaces.

DIRECTIONS: For heavy deposits of tar or grease, apply at full strength with a sprayer or brush. Allow 5 minutes contact time before rinsing with hot water. It can be diluted 1 to 1 with kerosene for normal cleaning operations. For lighter cleaning, dilute up to 10 parts water. In all applications, rinse well with hot water after degreaser has been applied.
