T-300 TAR REMOVER & DEGREASER

This product is a highly effective and versatile degreaser designed to remove bitumen and tar deposits from heavy equipment and vehicles. It is a solvent-based degreaser that will soften and dissolve heavy grease deposits.

It contains biodegradable surfactants and emulsifiers that enable it to rinse freely with hot water. This product is well suited for many applications where other solvents are restricted. It will not freeze.

DIRECTIONS: For heavy deposits of tar or grease, apply full strength with a pressure sprayer or brush. Allow 5 minutes contact time before rinsing with steam or hot water.

For lighter degreasing operations, dilute 1:1 with kerosene.

In all applications, rinse well with hot water.
