X-CEL DEGREASER

This product is an excellent solvent based degreaser designed to loosen and dissolve grease, tar and bitumen. This product is well suited for the oilfield and heavy industrial degreasing. Surfactants and emulsifiers contained in this degreaser make it free rinsing with water.

DIRECTIONS: For heavy deposits of tar or grease, apply full strength with a pressure sprayer or brush. Allow 5 minutes contact time before rinsing with steam or hot water.

For lighter degreasing operations, dilute 1:1 with kerosene.

In all applications, rinse well with hot water.
