

J416

TECHNICAL DATA SHEET

FRYER CLEAN

This product is a concentrated granular cleaner for boiling out stainless steel fryers.

DIRECTIONS:

Drain all oil and food particles from fryer.
Fill the fryer about 3/4 full with warm water.
Add 225 g (8 oz) of this product slowly and let the water boil.
Let simmer 15 - 20 minutes.
Drain the solution from fryer.
Rinse out all residue.
Neutralize with a solution of vinegar and water.

CAUTION: This product contains caustic soda. Avoid prolonged and repeated contact with aluminum.
