## INDUSTRIAL FLOOR CLEANER

This product is a granular high quality cleaner and degreaser designed for effective removal of oil, grease and soil from concrete and tile floors.

It is a non-dusting white powder with a light lemon fragrance that dissolves with ease in water.

**DIRECTIONS:** Dilute product at 1:100 parts of hot water and apply with brush or mop. (More product may be required for tougher degreasing jobs.) Mop dry or use a squeegee. When cleaning concrete floors, product may be sprinkled onto pre-wetted floor at a rate of ½ - 1 kg per 10 square metres. Brush vigorously and rinse with plenty of hot water.

**NOTE:** This is an alkaline product. When cleaning waxed floors, stronger concentrations may remove the floor finish.
