## MELAMINE CHLORINATED PRESOAK

This product is an alkaline and highly chlorinated liquid presoak for use in restaurant kitchens, bars, hotels and institutions. The high chlorine concentration rapidly removes coffee and tea staining from cups. It is also very effective at breaking down grease and protein. This product may be used with stainless steel flatware, porcelain dishware and melamine dishware.

**CAUTION:** Do NOT use with silver flatware. Chlorinated products discolour silver flatware.

### DIRECTIONS:

Pre-rinse flatware and dishware to remove loose food debris.

Add 6 - 10 mL/L to warm water.

After soaking, rinse flatware and dishware thoroughly to remove all suds before loading into the dishwasher.

For 100 ppm available chlorine, use 6 ml/litre of water or 1 oz/gallon.

For 200 ppm available chlorine, use 12 ml/litre of water or 2 oz/gallon.
