TECHNICAL DATA SHEET

D-50 DEFOAMER

This product is specially formulated to prevent and eliminate excessive foam in various food plant, industrial and chemical processes. An effective defoamer will reduce pump cavitation, increase spray efficiency, reduce cleaning time and improve rinsing.

DIRECTIONS: It can be used in automatic scrubbers, rug steam machines, etc. at a rate of 1/4 – 1/2 oz/gallon (1.5 - 4 ml/L) in the recovery tank. For other uses, add defoamer as required. The amount needed will depend on tank size, type of agitation, chemical being used and type of water.
