P-17 BOWL CLEANER

This product is a viscous pleasantly-perfumed liquid bowl cleaner formulated without hydrochloric acid for cleaning toilet bowls and urinals without damage to fixtures or plumbing. There are no fumes and it is safe for use in septic systems. It may be used on ceramic, chrome and metallic surfaces.

DIRECTIONS:

TOILETS: Squeeze 50-100 ml directly into bowl, onto the sides and under the rim. Allow product to react for 2 to 3 minutes then scrub all surfaces with a bowl mop. Flush well.

URINALS: Follow above directions and once every second week inject 100 ml directly into the waste pipe. Heavily stained or badly neglected fixtures may initially require a second application. Regular use thereafter will maintain sparkling clean, stain and odour-free fixtures.

CAUTION:

Contains lactic acid. Do not use on painted surfaces. Protect from freezing.
