TECHNICAL DATA SHEET

GERMICIDAL HAND SOAP

DIN 01977873

GUARANTEE: 0.6% para-chloro-meta-xyleneol

This product is a synthetic coral-colored antibacterial hand soap specifically formulated for gentle and efficient cleansing of hands. It contains PCMX, which is a highly effective broad spectrum antimicrobial agent that provides excellent anti-bacterial activity to reduce and control the microflora of the skin, while imparting residual bacteriostatic activity.

This product is ideally suited for institutional and food plant applications.

DIRECTIONS: Place approximately 1 -2 ml in palm of hand, add 15 cc of water, lather and wash in a normal manner. Rinse hands thoroughly with potable water.
