

J830

TECHNICAL DATA SHEET

**LIQUID
CARPET PRESpray**

This product is designed to loosen and dissolve hard-to-clean soil from high traffic areas of carpets in commercial buildings prior to cleaning with hot water or steam extraction equipment. By pre-spraying these difficult areas the chemical has a longer contact time with the soiled area and allows the rug cleaning equipment to do a far better job. This product will not cause excessive foam and is safe to use with standard commercial and household carpets including commercial nylon and olefin carpets.

It can also be used as a spotting agent and is effective in removing most common stains such as oil, grease and food stains carpets.

DIRECTIONS: Dilute product with hot water at 1:2 to 1:8. Spray solution on the area to be cleaned with a liquid sprayer (garden sprayer). Hold the nozzle about one foot over the carpet and apply in a fine spray or mist. Allow a minimum of 2 minutes contact time before cleaning with hot water or steam extraction equipment. Dilution will depend on cleaning application.
