

L504

H.D. LAUNDRY DETERGENT

This product is a high quality, heavy duty, high sudsing laundry detergent. It is blended to include complex detergent builders, surfactants, wetting agents and optical brighteners and is recommended for use in both soft and hard water areas. It is ideal for domestic and institutional use, as well as for more delicate washing operations. It also does well on heavy soil removal. This product works well with any type of alkali. It is ideal for food plant use.

DIRECTIONS: For commercial machines, use 6-10 ounces of detergent for each 50 lbs. of dry clothes. More may be required for extra heavy soil and dirt conditions. For domestic top loading machines, use 1/2 – 3/4 cups per load. It is also ideally suited for high-efficiency domestic washers at a reduced amount.
