## FIRE PROTECT 40 NON-TOXIC GLYCOL SOLUTION

This product is a 40% premixed inhibited propylene glycol based antifreeze solution effective to -22°C.

It is designed for use in automatic sprinklers and other fire protection systems where it could be exposed to very high temperatures during fires. It is a clear, colourless and odourless liquid that meets the requirements as proposed by the NFPA Standards Council.

The inhibitor package in this product provides excellent corrosion protection.
