## X-400 LOW SUDS

This is a highly finished low-sudsing laundry detergent. It is blended to include complex detergent builders, surfactants, wetting agents and optical brighteners and is recommended for use in soft and hard water areas. It is ideal for domestic and institutional use, as well as for more delicate washing operations. It also does well on heavy soil removal. This product can be used with any type of alkali.

**DIRECTIONS:** For commercial machines, use 3/4 - 1 1/4 cups (6-10 ounces) per 50 lbs. of laundry. More detergent may be required in hard water areas and for heavy soil.

When used in domestic washing machines, use 1/2 to 3/4 cup per load for normal washing conditions. It is also ideally suited for use in high-efficiency domestic washers at a reduced amount.

**COMMERCIAL USE ONLY**
