TECHNICAL DATA SHEET

AUTOMOTIVE WASH AND WAX

This is a concentrated, all-in-one product that will effectively wash vehicles and leave them looking shiny and new.

The blend of detergents will remove film and road-grime leaving a clean surface. The polish can then add a lustrous shine and corrosion protection, while also preventing water spotting.

DIRECTIONS:

For use with pressure wash equipment, dilute product 1:80 to 1:20 with hot water for best results. Rinse with cold water.

For cleaning with touchless car wash equipment, dilute 1:100 to 1:250 with hot water for best results. Rinse with cold water.
