# TECHNICAL DATA SHEET

## LOW pH PRESOAK

This product is an unscented, low pH presoak designed for use in a two-step process combined with a high pH presoak. Low pH Presoak will help to dissolve road salts and loosen dirt and road film. When used in conjunction with a high pH presoak, allow up to 30 seconds to dissolve soils.

**DIRECTIONS:** Product is designed to be diluted at a ratio up to 1:160 with warm water. This product can be used directly before or after the high pH presoak.
