

D330

BOSS

(LIQUID PRESSURE WASH DETERGENT)

This product will effectively remove road soil from all types of vehicle finishes.

DIRECTIONS: Dilution requirements will vary with the degree of soil to be removed. The normal dilution range is 1:50 to 1:150 parts water. Apply the solution with high pressure spray equipment, followed by a hot or cold water rinse. Optimum cleaning performance will be obtained with the use of hot water.
