

G595

WATERLESS URINAL SEALANT

This product is a safe ready-to-use sealing liquid for non-cartridge based waterless urinals and as a refill in cartridge based waterless urinals. Its low density allows it to float on top of urine, sealing the urinal trap and preventing malodour from entering restroom facilities. This product is formulated with pine oil, giving it natural antimicrobial and deodorizing properties.

DIRECTIONS:

Most waterless urinals require 3-4 oz (75-100 ml) of sealing liquid. Waterless Urinal Sealant typically lasts for up to 1000 urinal uses. For optimum freshness, it is recommended to replenish it at least once per month.
