

G651

ENVIRONMENTAL ORANGE FOAMY

This product is a heavy duty cleaner/degreaser formulated for commercial and industrial use. It is a highly concentrated product that produces a rich foam. It is fortified with natural citrus oil and is fully biodegradable. This product is safe to use on most surfaces. It can be used on heavy-duty equipment, tractors, trucks, trailers, hog barns, cattle barns, tin and vinyl siding, slaughter houses, engines, and for soot removal.

DIRECTIONS:

For light duty cleaning applications, dilute 1:100 with water.

For heavy duty cleaning and degreasing, dilute 1:10-1:25 with water.

For best results, use a foamer to produce dense, stable foam that clings to a vertical surface, maximizing contact time and product efficacy. Allow as much dwell time as possible without allowing product to dry on surface. Rinse with water.

Do NOT use concentrated product on paint or glass. Rinse well after cleaning.
