

G692

SUMMER WINDOW CLEANER CONCENTRATE (10:1)

This product is an excellent, streak-free window and glass cleaner that needs to be diluted prior to use. The quality of the water used for dilution is important to the overall product effectiveness, with soft/deionized water being preferable.

This product is formulated with biodegradable surfactants and contains no alcohols or other volatile ingredients. It excels in cleaning and film removal. It outperforms most national brand window cleaners and can safely be used on glass, windshields, white boards, eyeglasses, goggles, Plexiglas, tabletops and computer screens.

Dilute 1:10 with water. Apply with a spray bottle, cloth or sponge. Wipe dry with a clean cloth, paper towel or squeegee.
