CITRUS BLAST AIR FRESHENER

This product is a highly concentrated air freshener formulated with 10X more fragrance than other air fresheners. It also contains anti-odorants that neutralize smelly acids, amines, mercaptans, thioesters and ammonia – the common odour-causing agents in sweat, urine, decaying organic matter and cigarette smoke. The neutralization reaction is swift and permanent. The scent left behind is pleasant lemon.

DIRECTIONS: Citrus Blast Air Freshener is a safe to use on all surfaces. It can be diluted up to 10 fold with a liquid partitioning system. It may also be used straight when warranted, depending on the degree of malodor and user preference.

COMMERCIAL USE ONLY
