## TannOut

This product is a laundry pre-spotter specially formulated to efficiently remove tannin-based stains. It excels at removing stains that come from coffee, tea, cocoa and berries. The unique blend of solvents, emulsifiers and acids works quickly to break down and solubilize even the most stubborn of tannins.

This product is both dye and fragrance free in order to minimize the risk of fabric staining and skin sensitization.

**DIRECTIONS:**

**Clothing Spot Remover:** Apply spotter to the stain. Ensure that the product fully saturates the stain. Work it in thoroughly until the stain disappears. Flush with water or rewash. Repeat if necessary.

**Spot Remover:** Apply spotter to the stain or spot and leave it on the fabric for at least 5 - 10 minutes before including it in the general wash load. Gently working in the product with a brush helps improve stain penetration.

**CAUTION:**

Do not use this product in combination with chlorine bleach. Be sure to wear protective gloves and avoid skin contact.
