

T630

LIQUID ROLLER CLEANER

This product is a highly concentrated non-foaming alkaline cleaner ideally suited for use in food plants and other industrial applications. It may be used in meat and poultry packing plants to clean rollers, hooks, trolleys, tables, carts and areas where excessive grease, fat and rust are encountered.

DIRECTIONS: For removing light soil and rust, use 2-4 oz per gallon of water (1.5% - 2.5% solution). For de-rusting hooks and trolleys, use 10-16 oz per gallon of hot water (6.5 - 10% solution). Hooks and trolleys should be immersed for 10-15 minutes longer if necessary, then rinsed and dipped in a mineral oil based chain lubricant bath to prevent rusting.

CAUTION: Contains caustic soda. Avoid contact with aluminum and other soft metals.
