# TECHNICAL DATA SHEET

## SODIUM METASILICATE ANHYDROUS

This product is a highly concentrated and active laundry alkali used for the effective removal of stubborn grease, stains and other soil encountered in commercial laundry applications.

It is an excellent additive for maintaining a high pH in wash cycle. It also provides outstanding anti-redepositioning of soil.

**DIRECTIONS:** This product should be used as a builder in combination with a laundry detergent or soap. Enough should be added to achieve a pH of 11 - 11.5 in the wash cycle.

**NOTE:** This is an alkaline product. Always use a sour in the rinse cycle when washing with this product.
